Results-driven Front-End Developer with 4+ years of experience building scalable, high-performance web applications using **JavaScript, TypeScript, React, NextJS, Angular, NodeJs and Ruby on Rails**. Specialized in crafting responsive, accessible interfaces with **Tailwind CSS** and **Material UI**, backed by robust APIs (**Node.js, PostgreSQL**) for seamless functionality. Passionate about UI/UX design, I blend aesthetics with technical precision to create intuitive, engaging user experiences. Proven track record in optimizing performance (**CI/CD pipelines, Azure DevOps**), strengthening security, and boosting operational efficiency across EdTech, industrial automation, and inventory management systems

Skillset

- **Frontend:** JavaScript, TypeScript, HTML, CSS, ReactJS, Next.js, Redux, Angular
- **Styling:** SASS(CSS), Material UI, Tailwind CSS, Styled Components
- **API's and Data:** JSON, REST-API, GraphQL (Basic)
- **Tools:** Git, Github, Gitlab, Postman, Docker, Jira, WebSockets
- **UI/UX:** Figma, Responsive & Accessible Design
- **Backend:** Node.js, MongoDB, PostgreSQL
- **Other:** Microsoft Azure DevOps, Data visualization, Cross-browser compatibility, Accessibility, Agile methodologies, Shopware.

Work Experience

Full Stack Developer - Contract (Freelance) [MatchTips.no](#) **Dec 2025 - May 2026**

Software Development Team Bremen, Germany(Remote)

- **Architected and deployed** a high-performance football match tipping platform using **Next.js** and **Tailwind CSS**, delivering a seamless, responsive user experience for a sports-tech startup.
- **Engineered real-time multiplayer functionality** and concurrent betting updates by leveraging **Supabase** real-time subscriptions, ensuring data consistency across thousands of simultaneous user interactions.
- **Developed complex game logic** and automated scoring systems to handle diverse football match outcomes and user tipping rankings.
- **Built a comprehensive Admin Dashboard** to manage live game data, monitor user activity, and moderate active betting pools, replacing manual database interventions.
- **Optimized backend performance** through efficient PostgreSQL schema design and edge function integration, minimizing latency for time-sensitive match updates.

Full Stack Developer - Part-time [Institute of Information Management Bremen \(ifib\)](#) **May 2024 - July 2025**

Software Development Team Bremen, Germany

- Developed a global data visualization platform enabling social scientists to upload and analyze datasets (birth rates, literacy rates, policies) through intuitive dashboards.
- Engineered responsive front-end interfaces using **React, JavaScript, and Material UI**, configured with **Webpack** ensuring seamless cross-device accessibility.
- Designed and optimized a **Rails API** and **SQL database** to ensure fast and efficient data retrieval for the platform's advanced filtering systems and data fetching strategies. My work involved integrating with multiple

external services to enrich and combine datasets.

- Built secure admin dashboards (**React + Rails**) to manage datasets, user roles, and platform activity - replacing manual database scripts with a proper interface.
- Created advanced data filtering systems in rails with **ApexCharts.js visualizations** for richer data exploration.
- Implemented robust **user management (Rails backend)** with email validation, reducing bot activity by 95%
- Restructured messy codebase into clean, maintainable architecture - reducing onboarding time for new developers
- Elevated user experience through complete **UI/UX** overhaul - modernizing **React/SASS** components and optimizing **Rails API** integrations, receiving exceptional client feedback for the intuitive new interface.
- Gained hands-on experience handling unstructured datasets, enhancing the platform's ability to process and visualize diverse data formats.

Tech Stack: React, JavaScript, Ruby on Rails, PostgreSQL, Material UI, SASS/CSS, [ApexCharts.js](#), Webpack, REST Api

Software Engineer - Part-time

Emotion Warenhandels GmbH

Jul 2023 - Dec 2023

Software Development Team

Bremen, Germany

- Redesigned inventory management through an intuitive **React/TypeScript** admin dashboard, delivering clearer data visualisation and more efficient monitoring tools for department managers.
- Improved system performance by optimizing **PHP/PostgreSQL APIs**, implementing smarter queries and caching strategies that accelerated response times across the platform.
- Enhanced operational efficiency by redesigning core data flows in the inventory system, leading to more accurate order processing and faster fulfillment cycles.
- Gained hands-on experience with the **Shopware** e-commerce platform, contributing to the maintenance and feature development of the company's online storefront.

Tech Stack: React, TypeScript, Angular, PHP, PostgreSQL, Shopware

Application Developer - Full-time

Accenture Solutions Pvt Ltd

Dec 2020 - Aug 2022

Software Development Team

Bangalore, India

- Accelerated development cycles by building efficient **React/TypeScript** applications in agile environments, enabling faster delivery of industrial automation solutions.
- Improved deployment reliability by implementing automated **CI/CD** pipelines using **Azure DevOps** and **Git**, significantly increasing release frequency while maintaining stability.
- Streamlined release management by overseeing code deployments in Azure DevOps, ensuring timely delivery of sprint commitments and smooth agile workflows.
- Enhanced team productivity by automating infrastructure setup and optimizing project dependencies through Azure DevOps configurations.
- Developed backend services with **Node.js** and TypeScript for an industrial management system, streamlining the onboarding of new projects.

Tech Stack: React, Redux, JavaScript, Typescript, Azure DevOps, PostgreSQL, CI/CD pipelines, NodeJS

Education

- **M.Sc. Digital Media Informatics**, University of Bremen, Germany **2022 –2025**
- **B.E. Computer Science**, KLE Technological University, India **2016 –2020**
